- Manual Skew Adjustment For Accurate Roll Alignment
- Touchscreen Interface With Integrated Video Tutorials For Easy Use
- Manufactured in Italy
- List Price \$9,995

Neolt XY DTF Cutter
Optional Stand

OVERVIEW

The Neolt XY DTF Cutter from CUTWORX USA is a precise and efficient solution for cutting Direct to Film (DTF) and Heat Transfer Vinyl (HTV) materials. It accommodates media up to 31 inches wide and features a built-in compressor for pneumatic rollers and cutting units, ensuring smooth handling of various materials. Its self-sharpening cutting wheel minimizes maintenance while delivering consistent performance, making it ideal for high-volume workflows.

With two modes—Automatic for batch cutting and Cut Marks for precision—it offers versatility for different cutting needs. Manual skew alignment ensures roll accuracy, while the intuitive touchscreen interface with integrated video tutorials makes operation simple. The Neolt XY DTF Cutter is a reliable, user-friendly tool for streamlining DTF production and achieving professional results.
